Teacher's Support Policy

Teacher's Name	
Job Title	
Curriculum Coordinator	
Campus Manager	
Academic Year	

Introduction

This policy describes how Berkeley International School Support, supervises, and evaluates teaching faculty's performance over the academic year, including how to provide feedback and create Teacher Professional Development (TPD) plans. It applies to all Berkeley staff members who teach.

In other words, this policy tell us:

- How Berkeley International School helps teaching faculty improve their performance.
- How Berkeley International School makes sure that teaching faculty are meeting expectations.
- How Berkeley International School provides feedback to teaching faculty.
- How Berkeley International School helps teaching faculty develop their teaching skills.

This policy applies to all Berkeley staff members who teach.

Purpose of the policy

1. Support and evaluation will help teachers improve their skills, teaching practices, and student learning outcomes. They will make sure that teachers have the skills and knowledge they need to meet the needs of their students and fulfil their other responsibilities as teachers.

2. Support and evaluation will be on an ongoing process, including formative assessment, self-assessment, goal-setting, professional development, and end-of-year evaluation.

3. Teachers will receive ongoing support and feedback to help them improve their teaching and student learning. This will include both formative assessment (feedback on teaching practices in real time) and self-assessment (teachers reflecting on their one teaching), as well as goal-setting and professional development. At the end of the year, teachers will receive a summative evaluation of their performance.

Responsibilities for Support and Evaluation

The Campus Manager and Curriculum Coordinators are responsible for supervising teachers and developing procedures to help them improve their teaching quality. Teachers are accountable for their own evaluation, reflection and growth, and they should be open to administrative supervision.

In other words, the Campus Manager and Curriculum Coordinators are responsible for helping teachers improve their teaching. They do this by providing feedback and support, and by developing procedures that help teachers learn and grow. Teachers are also responsible for their own professional development, and they should be open to feedback from their supervisors.

Nature of Supervisory Activities

Teachers should receive direct support to help them succeed as educators. The amount of support they receive will vary depending on their experience and needs.

1. All teachers receive formative observations with feedback in domain 3 (Learning experience with Observable Classroom Indicators) during the first semester.
2. At mid-year, all teachers reflect on their first semester performance and set goals on the mid-year evaluation form. Teacher Professional Development (TPD) workshops are then held for staff in the identified areas for development. The efficacy of the initiative is then measured by a second round of observations and self-reflection in semester 2.
3. In addition to domain 3, teachers also reflect on domains 1(Planning and Preparation), 2 (Learning Environment), and 4 (Principled Teaching). Domains 1, 2, and 4 are all self-reflection.
4. The second semester follows the same process as the first semester. The campus manager or curriculum coordinators observe teachers and provide constructive feedback using the Observable Classroom Indicators form.
5. At the end of the year, all teachers complete an annual performance summary evaluation covering all 4 domains, following Charlotte Danielson's model. This evaluation is shared with the curriculum coordinator and campus manager. The instructional domain performance evaluation is based on the summative second semester observations and the domain 3 self-reflections. The final evaluation may include adjustments, and areas for development will be considered for next year’s training.

Berkeley International School Framework for teaching based on Danielson's model*

DOMAIN 1 **Planning and Preparation** Demonstrating knowledge and content of pedagogy Demonstrating knowledge of resources and technology	DOMAIN 2 **Learning Environment** Organising physical and digital space Managing student's behaviour and ensuring students' safety.
DOMAIN 3 **Learning Experiences** Activating prior knowledge and engaging students Appropriate and varied Instruction. Providing feedback and opportunities for reflection.	DOMAIN 4 **Principled Teaching** Correct channels of communication. Adheres to policy and procedure . Participating in a professional community.

Semester 1

Self Assessment and Reflection Form

Domain 1: Planning and Preparation	**Emerging**	**Developing**	**Proficient**	**Advance**
1A. Demonstrating knowledge and content of pedagogy				
1B. Demonstrating knowledge of resources and technology				
Domain 2: The Classroom Environment	**Emerging**	**Developing**	**Proficient**	**Advance**
2A. Organising physical and digital space				
2B. Managing student's behaviour and ensuring students' safety.				
Domain 4: Principled Learning	**Emerging**	**Developing**	**Proficient**	**Advance**
4A. Correct channels of communication.				
4B. Adheres to policy and procedure .				
4C. Participating in a professional community.				
Reflection and Goal-Setting				
Supervisor's Feedback				

Formative Observation Form (Domain 3: The Instruction)

Teacher Name	Subject/Grade Observed:	Observer(s):	Date(s):

3A. Prior knowledge is activated and students are engaged:	Emerging	Developing	Proficient	Advance
3A.1. Use pre-assessments to find out what students already know and what they might be misunderstanding about a new topic of study.				
3A.2. Use opening hooks to get students interested in the topic and to make it relevant to their lives.				
3A.3. Engage all students in lesson activities, including using Total Participation Techniques (TPTs) to encourage higher-order thinking				
3B. Instruction is appropriate and varied:	**Emerging**	**Developing**	**Proficient**	**Advance**
3B.1. Appropriate instructional strategies used to help learners' acquire knowledge and skills, make meaning of unit content, and transfer their learning?				
3B.2. Seamless classroom routines, procedures and transitions utilised effectively in order to maximise instructional time?				
3C. Feedback is Given for Revision and Reflection	**Emerging**	**Developing**	**Proficient**	**Advance**
3C.1. Students are given regular opportunities to rethink, revise and reflect on their work based on feedback from ongoing (formative) assessments?				
3C.2. Students expected to self-assess/reflect on their work/learning and set goals for improvement? (In Kindergarten - while not being evaluated, teachers are encouraged to use age appropriate opportunities to encourage students to assess and monitor their work)				
Supervisor's Feedback				

To be filled out by HR:
Total score : _____/56

Semester 2

Self Assessment and Reflection Form

Domain 1: Planning and Preparation	Emerging	Developing	Proficient	Advance
1A. Demonstrating knowledge and content of pedagogy				

1B. Demonstrating knowledge of resources and technology Domain				
2: The Classroom Environment	**Emerging**	**Developing**	**Proficient**	**Advance**

Total score : _____/56

Rubric

Domain 1: Planning and Preparation

1A. Demonstrating content knowledge and pedagogical content knowledge.			
Emerging	Developing	Proficient	Advanced
Makes consistent content errors.	Displays adequate concept and content knowledge although requires coaching and mentoring in this area.	The teacher can identify important concepts of the discipline and their relationships to one another. Demonstrates understanding of pedagogy which reflects current research on best practices.	Gives evidence of continuing pursuit of current concept and content knowledge The teacher demonstrates understanding of how content is linked within and across disciplines.
1B. Demonstrating knowledge of resources and technology			
Emerging	Developing	Proficient	Advanced

Demonstrates little or no familiarity with resources and/or technology to enhance own knowledge, to use in designing instruction or provide for students in order to enhance learning.	The teacher uses only some of the materials provided by the school and does not search beyond the school for additional resources or technology to utilise in the classroom.	The teacher uses most of the resources and technology available through the school to enhance own knowledge, to use in designing instruction or to provide for students in order to enhance learning.	The teacher uses most or all of the resources and technology in the school and also searches beyond the school, on the internet, and in the community to enhance own knowledge, to use in designing instruction and to provide for students in order to enhance learning.

Domain 2: The Learning Environment

2A. Organising physical and digital space			
Emerging	Developing	Proficient	Advanced
There is minimal to no alignment between the learning activities, student needs, and the digital and physical environment. The teacher rarely or does not allow students to take the initiative to adjust the digital and physical environment to foster collaborative and individual work. Available technology is not being used even if it is available and its use would enhance the lesson.	There is partial alignment between the learning activities, student needs, and the digital and physical environment. The teacher seldom allows students to take the initiative to adjust the digital and physical environment to foster collaborative and individual work. The teacher makes limited use of available technology and other resources.	There is near-total alignment between the learning activities, student needs, and the digital and physical environment. The teacher frequently allows students to take the initiative to adjust the digital and physical environment to foster collaborative and individual work. The teacher makes appropriate use of available technology.	There is total alignment between the learning activities, student needs, and the digital and physical environment at all times. Students take the initiative to adjust the digital and physical environment to foster collaborative and individual work. The teacher and students make extensive and imaginative use of available technology.
2B. Managing student's behaviour and ensuring students' safety			
Emerging	Developing	Proficient	Advanced
The teacher rarely or does not lock classroom doors when the classroom is unsupervised. The doorways are rarely or never clear of obstacles which hinders safe and swift exiting. The classroom environment is chaotic, with no standards of conduct evident. The teacher does not monitor student behaviour.	The teacher attempts to maintain order in the classroom, referring to classroom rules, but with uneven success. The teacher attempts to keep track of student behaviour, but with no apparent system. The teacher usually locks classroom doors when the classroom is unsupervised. The doorways are frequently clear of obstacles which hinders safe and swift exiting.	Standards of conduct appear to have been established and implemented successfully. Overall, student behaviour is generally appropriate. The teacher almost always locks classroom doors when the classroom is unsupervised. The doorways are very frequently clear of obstacles thus providing safe and swift exiting.	Student behaviour is entirely appropriate; any student misbehaviour is very minor and swiftly handled. The teacher silently and subtly monitors student behaviour. The teacher always locks classroom doors when the classroom is unsupervised. The doorways are always clear of obstacles thus providing safe and swift exiting.

BERKELEY INTERNATIONAL SCHOOL ELT

Domain 3: The Instruction

3A.1. Use pre-assessments to find out what students already know and what they might be misunderstanding about a new topic of study.			
Emerging	Developing	Proficient	Advanced
Very little or no evidence of diagnostic activities was observed.	Diagnostic activities are sometimes used to check students' prior knowledge, skills, understandings or misconceptions although not all learning goals are covered.	Diagnostic activities are mostly used to check students' prior knowledge, skills, understandings and misconceptions. Students' brain schemas are activated in order to assimilate new information.	Diagnostic activities are strategically used to check students' prior knowledge, understanding, skills and misconceptions. Students' brain schemas are activated in order to assimilate new information. It is evident that the teacher uses the information to tailor instruction.
3A.2. Use opening hooks to get students interested in the topic and to make it relevant to their lives.			
Emerging	Developing	Proficient	Advanced
'Hooks' are not yet being used to engage students in unit content.	'Hooks' are used to engage students in unit content. They may be inconsistent, may not be relevant to unit content, or may not make content relevant to students' lives.	'Hooks' are consistently used which are relevant to unit content, are engaging and make unit content relevant to students' lives.	'Hooks' are consistently used which are relevant, engaging and make unit content relevant to students' lives. The hook explores big ideas within and across subjects, and the teacher makes interdisciplinary connections explicit.
3A.3. Engage all students in lesson activities, including using Total Participation Techniques (TPTs) to encourage higher-order thinking			
Emerging	Developing	Proficient	Advanced
Strategies are very infrequently employed or not employed to actively engage all students.	Strategies are employed (but delivered only somewhat effectively) so that all students are engaged and participating in only some learning activities or the activities do not require higher-order thinking.	Strategies are employed (and delivered effectively) so that all students are engaged and participating in most learning activities including being required to display higher-order thinking.	Strategies are employed (and delivered very effectively) so that all students are given the opportunity to engage and participate in every learning activity including being required to display higher-order thinking.
3B.1. Appropriate instructional strategies used to help learners' acquire knowledge and skills, make meaning of unit content, and transfer their learning?			
Emerging	Developing	Proficient	Advanced
Only acquisition activities are evident. Activities are not balanced.	There is a lack of acquisition (A) or meaning making (M) or it is not clear to students how they will be required to transfer (T) their learning.	A balanced mixture of meaning-making (M) activities and acquisition (A) are utilised. It is clear to the students how they will be required to transfer (T) their learning in the summative assessment.	A balanced mixture of acquisition (A) and meaning making (M) activities are utilised. Students are also given the opportunity to transfer (T) their learning to new situations in addition to the summative assessment of the unit.
3B.2. Seamless classroom routines, procedures and transitions utilised effectively in order to maximise instructional time?			
Emerging	Developing	Proficient	Advanced
Much instructional time is lost due to a lack of or ineffective routines, procedures and transitions.	Routines, procedures and transitions are evident but they are not effective and lead to loss of instructional time.	Very little instructional time is lost through effective routines, procedures and transitions.	Instructional time is maximised through highly effective routines, procedures and transitions.
3C.1. Students are given regular opportunities to rethink, revise and reflect on their work based on feedback from ongoing (formative) assessments?			

Emerging	Developing	Proficient	Advanced
Feedback is not attempted or when it is, it is not high quality, specific nor timely.	Feedback is delivered effectively at one of the three levels. Feedback may be too general or superficial.	Feedback is delivered effectively at two of the three levels. Feedback is specific.	Feedback is consistently and effectively delivered at the task, process and self-regulation levels. Feedback is high quality, specific and timely.
3C.2. Students expected to self-assess/reflect on their work/learning and set goals for improvement? (In Kindergarten - while not being evaluated, teachers are encouraged to use age appropriate opportunities to encourage students to assess and monitor their work)			
Emerging	Developing	Proficient	Advanced
Students are infrequently given or not given opportunities to assess and monitor the quality of their own work against clear performance expectations.	Students are sometimes given opportunities to assess and monitor the quality of their own work against clear performance expectations.	Students are frequently given opportunities to assess and monitor the quality of their own work against clear performance expectations.	Students are frequently given opportunities to assess and monitor the quality of their own work against clear performance expectations and set goals for improvement.

Domain 4: Principled Teaching

4A. Correct channels of communication			
Emerging	Developing	Proficient	Advanced
The teacher ineffectively or does not use the correct channels of communication. The teacher's communication is frequently unclear and disrespectful.	The teacher somewhat effectively uses the correct channels of communication. The teacher's communication is sometimes unclear and disrespectful.	The teacher effectively uses the correct channels of communication. The teacher's communication is very frequently clear and respectful.	The teacher very effectively uses the correct channels of communication. The teacher's communication is always clear, concise and respectful.
4B. Adheres to policy and procedure			
Emerging	Developing	Proficient	Advanced
The teacher very infrequently or does not comply with the school's policies and procedures. The teacher does not complete and submits daily attendance and uses the student's referral form and the School Incident's Database.	The teacher frequently complies with the school's policies and procedures. The teacher frequently completes and submits daily attendance and uses the student's referral form and the School Incident's Database when appropriate.	The teacher very frequently complies with the school's policies and procedures. The teacher very frequently completes and submits daily attendance and uses the student's referral form and the School Incident's Database when appropriate.	The teacher always complies with the school's policies and procedures. The teacher always completes and submits daily attendance and uses the student's referral form and the School Incident's Database when appropriate.
4C. Participating in a professional community			
Emerging	Developing	Proficient	Advanced
The teacher does not/very infrequently volunteers or participates in school events, student activities and/or school improvement beyond the classroom and is ineffective when doing so.	The teacher infrequently and ineffectively volunteers and participates in school events, student activities and/or school improvement beyond the classroom.	The teacher frequently and effectively volunteers and participates in school events, student activities and/or school improvement beyond the classroom.	The teacher very frequently and very effectively volunteers and participates in school events, student activities and/or school improvement beyond the classroom.

Teacher's score:

Domain 1 (20%):

Domain 2 (20%):

Domain 3 (40%):

Domain 4 (20%):

Weighted Score:

> 85% = Advance*: During appraisal period frequently exceeds the expectations for the position.*

> 65% = Proficient*: During appraisal period met the expectations for the position.*

< 64 % = Developing: *Performance during appraisal period met some, but not all expectations for the position. Performance improvement process should be initiated.*

< 50% = Emerging*: Performance during appraisal period consistently failed to meet the minimum expectations for the position. Performance improvement process should be initiated.*
